ABSTRACT

This publication is one of two reports of the data acquired in the survey of Employees in Institutions of Higher Education that was included in the second Higher Education General Information Survey (HEGIS) conducted in the 1967-68 academic year. Though the survey was concerned with all employees in higher education, particular emphasis was placed on the instruction and research staff. Data are reported on the primary functions of all professional and nonprofessional employees by institution. In addition, separate tabulations are presented on major academic areas and on highest academic degrees for senior staff for resident instruction and departmental research and of senior staff for organized research. The Survey Report Form is included. (AF)

HIGHLIGHTS

A total of 714,949 persons were employed in professional positions in colleges and universities in the fall of 1967. This represents a 10-percent increase since 1966.

Full-time professional employment increased by 8 percent between 1966 and 1967, while part-time employment increased by 14 percent.

The full-time senior staff for resident instruction and departmental research represented 63 percent of the total full-time professional staff. The largest percent increase in full-time senior staff for resident instruction and departmental research between 1966 and 1967 was in public 2-year institutions, as shown below:

	Public	Private
Universities	9.7%	-0.5%
Other 4-year	10.2%	2.7%
2-year	17.6%	3.6%

Of the total full-time senior staff for instruction and research--

* 20 percent were women.

* 42 percent held the doctorate.

* the largest numbers were engaged in teaching or research in the social sciences, health professions, English and journalism, fine and applied arts, and the physical sciences, in that order.

In addition to the 714,949 professional staff members, there were 729,652 non-professional employees in institutions of higher education in 1967.

FOREWORD

This publication is one of two reports of the data acquired in the survey of Employees in Institutions of Higher Education which was included in the second Higher Education General Information Survey (HEGIS) conducted in the 1967-68 academic year.

Reported here are data on employee functions, academic specialties, and educational level. Although the survey was concerned with all employees in higher education, particular emphasis was placed on the instruction and research staff.

A companion publication entitled Higher Education Salaries, 1967-68 (OE-53015-68) reports on the salaries of administrators and the instruction and research staff.

The Office of Education is grateful for the cooperation of officials in higher education institutions who supplied the data for this report.

SURVEY PROCEDURES

The data in this publication were obtained from the three parts of the 1967-68 survey of Employees in Institutions of Higher Education which are reproduced in the appendix. Data are reported on the primary functions of all professional and nonprofessional employees. In addition, separate tabulations are presented on major academic areas and on highest academic degrees of senior staff for resident instruction and departmental research and of senior staff for organized research. For brevity, these two groups of senior staff members are collectively referred to as the instruction and research staff. The reader may wish to refer to the survey definitions in the appendix for further description of the populations covered.

Survey forms were mailed to the 2,382 institutions in the higher education universe as determined for the year 1967-68. The basic source of the universe was the Education Directory, 1966-67, Part 3, Higher Education,[1/] with such changes for the 1967-68 edition as were known to the Office of Education. Counts of institutions responding to the three parts of the survey are presented in tables I, IV, and VI. Response rates were sufficiently high to provide a valid base for the derivation of population estimates for the universe of institutions.

Population estimates of employees by primary function and of instruction and research staff by highest degree held were derived through the following two-step procedure, using total enrollment as reported in the Opening Fall Enrollment (OFE) surveys of 1966 and 1967[2/] as the basis for estimating data for nonresponding institutions:

(1) The first step involved the estimation of 1967 data for approximately 100 of the nonresponding institutions that reported data by primary function and by highest degree held in the employees survey of 1966. Estimates for each of these institutions were derived by applying the following ratio to the 1966 data for each of those institutions:

$$\frac{\text{Total OFE (1967) in the institution}}{\text{Total OFE (1966) in the institution}}$$

(2) The second step involved the estimation of data for the remainder of the nonresponding institutions. All institutions, except those for which estimates were derived in step one, were grouped by institutional level and control. The following ratio was computed for each of the six groups:

$$\frac{\text{Total OFE (1967) in responding institutions + total OFE (1967) in nonresponding institutions (excluding those in step one)}}{\text{Total OFE (1967) in the responding institutions}}$$

1/ U.S. Office of Education, Education Directory, 1966-67, Part 3, Higher Education (OE-50000-67). Washington, D.C.: U.S. Government Printing Office, 1967.

2/ U.S. Office of Education, Opening Fall Enrollment in Higher Education, 1966 (OE-54003-66), and Opening Fall Enrollment in Higher Education, 1967, by Marjorie O. Chandler and Mabel C. Rice (OE-54003-67). Both Washington, D.C.: U.S. Government Printing Office, 1967.

The data from the responding institutions in each group were then multiplied by the ratio for that group.

The estimates resulting from steps one and two were then summed to provide aggregate data as presented in tables II and VII.

To derive population estimates for data by major academic areas, counts of faculty members in nonresponding institutions were obtained from the catalogs for those institutions. The titles of faculty (e.g., Professor of Agriculture), as shown in the catalogs, were used as a basis for distributing faculty among the various academic areas. Since college catalogs generally list only full-time faculty, this method of estimation understates the numbers of part-time faculty.

To adjust for the understatement of part-time faculty by major academic areas, the following ratio was computed for each of the three institutional levels:

$$\frac{\text{Total part-time instruction and research staff (as estimated for the survey by primary function)}}{\text{Part-time instruction and research staff in institutions responding to the survey of major academic areas}}$$

The part-time staff reported for each academic area within each institutional level was then multiplied by the ratio for that institutional level. Estimates derived from this procedure appear in table V.

The institutions responding to the survey of primary functions are included in table IX. The population estimates in table II are based on these data.

In this report, institutions are classified as 2-year or 4-year. Two-year institutions are collegiate community or junior colleges or comparable institutions that offer programs reaching a level of at least 2 years beyond high school. Four-year institutions include all institutions, both graduate and undergraduate, which grant bachelor's or higher degrees or some recognition equivalent to such degrees (e.g., ecclesiastical recognition in a theological institution); in addition, they may offer programs that require less than 4 years. The 4-year institutions are further classified into two groups, universities and other 4-year. Universities are those 4-year institutions that give considerable stress to graduate education, confer advanced degrees as well as bachelor's degrees in a variety of disciplines from the liberal arts and sciences, and have at least two professional schools that are not exclusively technological.

The aggregate United States refers to the 50 States, the District of Columbia, and the outlying areas (Canal Zone, Guam, Puerto Rico, and the Virgin Islands).

To facilitate the processing of the data and for the convenience of the user, the totals in the tables were obtained by simple addition of the detail. There is no intention to imply that the data are accurate to the units digit.

APPENDIX--SURVEY REPORT FORM

DEPARTMENT OF HEALTH EDUCATION, AND WELFARE

U.S. OFFICE OF EDUCATION

WASHINGTON, D. C. 20202

HIGHER EDUCATION GENERAL INFORMATION SURVEY
EMPLOYEES IN INSTITUTIONS OF HIGHER EDUCATION

Report for summer 1967 and fall 1967 terms
(Please return report to the Office of Education on or before November 1, 1967.)

Name and title of person completing this report _____

Area code, telephone no., and extension _____

Employees in institutions of higher education consists of seven schedules. Each of these schedules is complete within itself, including instructions and definitions. This enables more than one person or office to complete the separate schedules. Please return these schedules to the U.S. Office of Education on or before November 1 and not later than the November 15 closing date.

For the most part, salary data are published by the Office of Education only in totals and institutional aggregates. In addition, some data may be published with the institution identified. You may specify below, in terms of location on the schedules, those data items, if any, which may not be identified with your institution in Office of Education publications.

Schedule Number	Column Number	Line Number
_____	_____	_____
_____	_____	_____
_____	_____	_____

Remarks: _____

Please examine the definitions and instructions. If you need additional clarification on any of the items, please call Mr. Richard M. Beazley, 962-6526, area code 202, in Washington, D. C.

NOTE: THE DATA PROVIDED IN THIS SURVEY MUST BE TYPED ON THESE FORMS, SINCE THEY WILL BE PROCESSED BY CHARACTER-READING OPTICAL SCANNING EQUIPMENT. PLEASE BE SURE THAT THE TYPEWRITER IS IN GOOD CONDITION, THAT THE KEYS ARE CLEAN, AND THAT THE RIBBON IS NEW. NYLON OR ONE-TIME PLASTIC BLACK RIBBONS PRODUCE THE BEST RESULTS. THE TYPING SHOULD BE CONFINED TO THE SPACE WITHIN THE PURPLE OUTLINES OR BOXES. PLEASE USE ONLY NUMBERS FOR ALL DATES, IN MONTH, DAY, AND YEAR SEQUENCE. STRIKEOVERS AND ERASURES SHOULD BE AVOIDED.

SCHEDULE I: NUMBER OF FULL-TIME AND PART-TIME PERSONNEL

Part A. By Primary Function, Fall Term 1967

INSTRUCTIONS AND DEFINITIONS

Please report each person only once according to his primary function (except for land-grant institutions which will provide a duplicative count in columns (6), (7), and (8), and separately organized Federal Contract Research Centers which will provide a duplicative count in columns (9), (10), and (11). If he is assigned to more than one function and each function occupies equal time, then count the person for the position of the higher level.

The employees to be reported are only those occupying regular positions with an institution of higher education, including all of its components, located in the United States and its territories. A regular position is to be considered as one that functions for at least one full term thereby excluding such personnel as those hired for peak periods only or those employed for brief periods of consultation.

The count should include, but not be limited to, the following:

1) Professional and non-professional staff (including student employees, both full-time and part-time). (Professional persons are those occupying a position which normally requires a bachelor's or higher degree.),

2) Salaried and non-salaried personnel, including "contributed services", as defined in Instructions and Definitions Item 3b.,of Schedule II,

3) Personnel on sabbatical leave.

This count should exclude the following:

1) Personnel on leave without pay,

2) Employees on overseas service,

3) Employees on temporary assignment for less than one full term,

4) Employees on retirement status,

5) Persons cooperating with, but not employees of the institution.

Budget Bureau No. 51-R567.1
Expiration Date 6-30-68

In addition to classifying employed personnel as full-time and part-time, please estimate the full-time equivalent of part-time employees (e.g., one person employed $\frac{1}{2}$ time plus two persons employed $\frac{1}{4}$ time each equals one full-time equivalent. Round to nearest whole number.

If exact data are not available, please estimate.

Item 1 - Resident Instruction and Departmental Research

a. Professional personnel
(1) Senior professional personnel (Exclude teaching and departmental research assistants - to be reported below). - Should include academic deans, department and division heads; all professional ranks in this function except as noted above; consultants on continuing basis; and all others whose primary function is resident instruction and departmental research at college level such as coaches, clinicians, military personnel, and "critic" teachers of elementary or secondary students in a laboratory school.

(2) Junior professional personnel who are teaching and departmental research assistants. - Includes assistant instructors, teaching fellows or assistants, laboratory assistants, readers, etc., whose primary functions are connected with resident instruction and departmental research.

b. Nonprofessional personnel. - Clerks, secretaries, stockroom attendants, audiovisual assistants, etc.

Item 2 - Organized Research. ACADEMIC DEAN	1								
PROFESSOR	2								
ASSOCIATE PROFESSOR	3								
ASSISTANT PROFESSOR	4								
INSTRUCTOR	5								
JUNIOR STAFF	6								
OTHER FACULTY	7								
TOTAL	8								

SCHEDULE V. INSTRUCTIONS

A. Rank

1. Academic deans are deans of instructional divisions such as Dean of the School of Education. Associate or Assistant Deans should be classified according to their respective rank of professor through instructor and not classified as deans. Administrative deans such as Dean of Admissions and Dean of Summer Session, should not be included.

2. Persons who do not hold the exact titles of professor, associate professor, assistant professor, or instructor, but who hold comparable positions, should be classified according to the rank of the corresponding position. Please equate titles, such as Director of Research, Associate Director of Research, Assistant for Research, Adjunct Professor, etc., to the comparable faculty rank, if possible. If not possible, see paragraph A4 below.

3. Junior staff are teaching fellows, teaching assistants, research assistants, junior instructors, or other persons below the rank of instructor.

4. Other academic faculty are persons who: 1) have no faculty rank, but teach courses, or 2) hold a full-time professional position in instruction or research that cannot be equated to a faculty rank.

B. Highest educational level

1. Bachelor's degrees or lower. Bachelor's degrees require the equivalent of at least four years of academic work, and include all bachelor's degrees, except the following which are classified here as first-professional: Law-LL.B. and Theology-B.D.

2. First-professional degrees in selected fields. The first-professional degrees are those degrees which signify the completion of the academic requirements for selected professions, which are based on programs which require at least 2 academic years of previous college work for entrance and which require a total of at least 6 academic years of college work for completion. Examples are: Professional degrees in Dentistry (D.D.S. or D.M.D.), Law (LL.B or J.D.), Medicine (M.D.), Theology (B.D.), Veterinary Medicine (D.V.M.), Chiropody or Podiatry (D.S.C. or D.P.), Optometry (O.D.), and Osteopathy (D.O.). Exclude all master's degrees (even though the master's is required in some fields, such as Library Science and Social Work, for employment at the professional level and even though as in the case of Social Work 4 years of undergraduate work are required for entrance into the program and an additional 2 years for completion).

3. Master's degrees. The master's degree is a second-level degree, beyond the bachelor's or first professional degree and below the doctorate. Include in this category all those holding the Master's as the highest degree, even though some master's degrees may be considered as first-professional.

4. Doctor's degrees. The doctorate classification includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Ph.D. degree in any field -- whether Agronomy, Food Technology, Education, Engineering, Public Administration, Ophthalmology, Radiology, etc. All other doctorates should be included except those classified as first-professional in instruction B.2., above.
